## EXPERIENCE

---

### Dure Technologies

Jun - Aug 2023

#### Marketing Intern

- Contributed to the development and execution of a social media strategy aimed at promoting the OneImpact app across various countries, with a primary focus on African nations and select regions like the Philippines. The goal was to collaborate with social media influencers, medical facilities and celebrities to amplify awareness of the OneImpact App.
- Participated in the OneImpact Global Workshop 2023, gaining knowledge of the company's services and strategies.

## PROJECTS

---

### Hospital Management System

Mar - Jul 2025

Full-stack Development | [GitHub](#)

- Developed an admin panel for managing doctors, patients, admissions, and billing
- Practicing component design and data management
- Goal: Demonstrate clean code structure, real-world UI, and backend integration
- Technologies:** React.js/Redux on frontend and Node.js/PostgreSQL on backend

### Product Management Application

Oct 2024

Frontend Development | [GitHub](#)

- Built a simple product management application that performs CRUD (create, read, update and delete) operations on product data. Data is securely stored in local storage as encrypted data.
- Technologies:** React.js, HTML/ CSS, React Data Table

### Online Shopping Platform

Dec 2024

Frontend Development | [GitHub](#)

- Created an e-commerce platform that fetches and displays data from an external API. Implemented product listings and cart functionalities, such as add and remove from cart.
- Technologies:** React.js, React Redux, API Integration, CSS

### Space Simulation in Java

Apr 2025

Academic Project | [GitHub](#)

- Simulates interplanetary travel using spacecraft and passengers
- Each planet has a unique time system; passengers have limited lifespans
- Updates status of planets, spacecraft, and passengers hourly
- Demonstrates **Java OOP**, simulation logic, and real-time updates
- 

## EDUCATION

---
